

MAGNUM 1500

MAGNUM 1500

The Martin Magnum name continues its reputation as a benchmark for top quality foggers with the new Magnum 1500.

The Magnum 1500 is an impressively powerful yet portable fog generator in a classic Martin design. Suited for clubs of all sizes, mobile DJs or anywhere atmospheric fog is needed, the Magnum 1500 is the perfect complement to the growing Mania line of performance lights.

Equipped with state-of-the-art electronics, the Magnum 1500 is powered by a 1,200W (240V) heater, giving a massive output, while a 2.3 liter onboard fluid container provides a long running capability.

A remote (included) with 5 meter cable controls variable output and features a timer function for greater effect regulation. To control the unit from any DMX desk, an optional and easy to install DMX interface is available.

An innovative "flip solution" allows the machine to be inverted for versatile positioning for more flexible horizontal or vertical projections. The Magnum 1500 comes with a flying bracket as standard and truss mounting bracket (also works as a handle) for easy installation.

Based on proven Martin technology and built from rugged components, the Magnum 1500 is designed for years of reliable service.

Massive output with a 2.3 liter onboard fluid container for long running capability

Optional DMX interface

2.3 liter fluid capacity

Analog timer and fog volume control

Strong safety wire eyebolt

"Flip Solution" for more flexible projections

State-of-the-art digital electronics

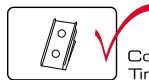

Classic and rugged design
