

# DABS1 Installation

Thank you for selecting the DABS1. The DABS1 USB hardware interface is used with the Martin Software Uploader program to update software in supported Martin luminaires.

## Pre-requisites

You need to connect to the Internet and download the DABS1 software drivers. These can be found at:

[http://www.martin.com/service/downloadfile.asp?name=DABS1\\_Drivers.zip&cat=73](http://www.martin.com/service/downloadfile.asp?name=DABS1_Drivers.zip&cat=73)

Extract these files from the zip file and place them in a location that you can easily find again on your computer.

## Installation

DABS1 is designed to work with PC's running Windows 98, ME, 2000 and XP.

To use the DABS1 a Windows driver must be installed on the PC:

- 1 Start Windows.
- 2 Connect the DABS1 to a USB port on the PC.
- 3 After a few seconds Windows will detect new USB hardware - 'Martin Professional USB DABS 1' - and start the **New Hardware Wizard**.
- 4 The **New Hardware Wizard** which will allow you to automatically or manually find a driver. Choose the manual option to 'install the drivers yourself'.
- 5 Specify the location of the driver files (the exact method depends on Windows version).
- 6 Browse to the location of the driver files and, depending on Windows version, select either the entire folder, or the DABS1.Inf file, to specify the driver.
- 7 Follow the **New Hardware Wizard** to finalize installation of the driver and restart Windows if prompted to do so.

The DABS1 driver is now installed and the DABS1 is ready for use.

## Connecting and disconnecting the DABS1

You should be able to connect and disconnect the DABS1 at any time.

**Note:** *Certain PC/Windows power saving settings may cause the DABS 1 interface to malfunction. If there are difficulties getting DABS 1 to detect or work properly - please disable as many power saving settings as possible including system hibernation.*

## Using the DABS 1 as a software upload device

The USB DABS1 interface may be used as fixture firmware upload device together with the Martin Software Uploader application (version 5.5 or higher). A copy of this software application is downloadable from:

*<http://www.martin.com/service/showpage.asp?id=3011&tit=DABS1>*
